

Letter of acceptance

Double M Properties ltd in co-operation with Heliostorage, Centria University of Applied Sciences and the Geological Survey of Finland have delivered a Borehole Thermal Energy Storage system to our factory in Sykäräinen, Finland.

The system consisting of heat capture installed at our compressor farm, solar collectors on the roof of our office building, a Borehole Thermal Energy Storage BTES drilled into a field behind our office and a controller unit has been in operation since April 2019. The soil temperature in the storage has reached 40C and we have already started using it partly for heating our office. We are excited to be in the frontline of clean renewable energy storage with this project.

Finn Spring Ltd. was founded in 1991 and now employs approximately 80 people. The most important raw material of the family-owned company is fresh, crystal clear spring water. We are located far from major cities, in the middle of the cleanest environment in Central Ostrobothnia, Finland.

Today Finn Spring Ltd. is the largest spring water manufacturer in Finland. SPRING AQUA Premium is exported almost all over the world. The company bottles over 80 million liters of spring water based beverages annually.
